We have the pleasure to present the fifth volume of the Polish Yearbook of Law & Economics. The collection presented in this volume encompasses works from various areas of the Economic Analysis of Law, selected on the basis of a review process from papers presented by Polish scholars at recent law and economics conferences, e.g. the 31st Annual Meeting of the European Association of Law and Economics (EALE) in Aix-en-Provence in September 2014, as well as the “Economic Analysis of Law” conference organized in March 2014 at the University of Warsaw by its Faculty of Law and Administration.
